Your Guide To...

The Reardan Clinic

Neighbors for Life

(509) 796-2737

Let the Home Team at the Reardan Clinic care for you!

The Reardan Clinic is literally a dream come true.

Long-time residents Bob and Juanita Johnson felt the people of Reardan deserved high quality accessible medical care right in their own community. The Johnsons, donating their own money, labor and time, helped Lincoln Hospital to form the Reardan Clinic back in 2000.

Since then, the clinic has grown. We've added more providers, services and moved to a larger facility. Although the Johnsons are no longer with us, they would be proud to see how their compassion for their friends and neighbors has developed into a full-service family clinic committed to top quality care through all life's stages — from newborn to adult.

Our Primary Care & Family Practice includes...

- Chronic Disease Management
- Pediatrics & Well Child Exams
- Men's & Women's Health
- Geriatrics & Aging Issues
- Sports Medicine & Athletic Physicals
- Urgent Care & Sick Call
- Minor Surgery, Stitches & Fracture Treatment
- Injection Room for blood draws & Protimes
- Diabetes Management & Education
- Asthma & Allergy Management
- Health Counseling including Smoking Cessation, Weight Loss & Adolescent Issues
- Family Planning Options & Issues

Watch for upgrades in services such as our proposed Radiology Suite!

Pediatrics

The Reardan Clinic team specialize in “kid-care” and offer all aspects of pediatrics in their practices. Well child exams, immunizations, sick call, injury treatment, sports physicals and management of childhood diseases are what we're here for. We even offer prenatal care. Parents are encouraged to be a proactive part of that care. Our providers listen to your concerns and family needs and integrate them into your child's care plan whenever possible.

Women's Health

Women's lives are full and complex. Our bodies are equally intricate, and finding a healthcare provider who understands and listens to our concerns is a must when it comes to taking charge of our health.

At the Reardan Clinic, we are dedicated to women's needs. To prove it, we've started a model women's health program to target the following issues...

- Mammography & Breast Health
- DEXA-Scan & Osteoporosis Management
- Cutting-edge Pap Testing & Cervical Cancer Prevention
- Family Planning & Sexual Issues
- Menopause & Individualized Hormone Replacement Therapy
- Cardiovascular Health

We also offer comprehensive women's surgery at Lincoln Hospital with our caring female surgeon Deanna Huntwork, DO.

Men's Health

Father. Son. Brother. Uncle. No matter how you cut it, your family needs you strong and healthy. To ensure this, our providers are committed to men's health including annual physical exams, comprehensive blood testing for cardiac health and prostate cancer screens. We also treat sports and work injuries and give DOT & flight physicals.

Minor Surgery

With more space, the Reardan Clinic now offers Minor Surgery which includes sutures, splints, casting of broken bones and removal of lesions and moles. With these services available locally, injuries and other more urgent conditions can be dealt with quickly in a caring, convenient setting by your trusted family providers.

Patient Financial Services

NBMC is a subsidiary of Lincoln County Hospital District #3— a public hospital. Under Federal law, some basic services are available even if you cannot pay or do not have medical insurance. NBMC does participate in the Medicaid Program.

NBMC accepts most major insurance plans including TriCare. To find out if your carrier is on our list of insurances, please call us at (509) 725-2548 or log on to our website at www.lincolnhospital.org and click on **North Basin Medical Clinics.**
