Shorten the road to recovery at Lincoln Hospital Transitional Care Rehab Unit

Our patients are precious — and so is their time, especially when recovering from illness, surgery or an accident.

For those in recovery who still require daily skilled nursing or rehabilitation, Lincoln Hospital has a program to fit that need — **Transitional Care**. Our Transitional Care Unit (TCU) is committed to helping patients get back to their lives, and the things that make them worth living.

Why should you choose us?

- Medicare/Medicaid Approved Critical Access Hospital just minutes from Spokane with 24-hour ER, Radiology & Lab. Surgeon available.
- Full-Service Acute Care & Transitional Care Units with personalized nursing care & low patient-to-nurse ratio
- Progressive Physical & Occupational Therapy staff & state-of-the-art rehabilitation equipment
- Comfortable private rooms with cable TV
- Highly rated meal service with plenty of food choices & dietitian consultations
- Activities and outings
- Access to Board Certified Family Practitioners at the Davenport Clinic
- Access to visiting specialists in Orthopedics, Cardiology, Urology & Hearing Aids
- TeleHealth consults with Spokane specialists
- Wound Management

Who needs transitional care?

When acute care hospitalization is no longer necessary, but a patient is not physically able to function at home, TCU is a positive intermediary step. Transitional Care is needed in these situations...

- Recovery from major surgery, joint replacement, vascular or abdominal procedures
- Repeated hospitalization
- Recovery after major accident or stroke
- Pain Management
- Wounds which are not healing or need special care
- Nutritional Therapy
- Chronic Disease Management including Parkinson's & MS

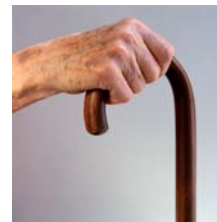

Occupational Therapy

As part of your recovery team, Occupational Therapy can help you adapt your daily activities more easily.

Obtaining the right equipment can make a big difference in recovery. If reaching or gripping cause pain, or there is difficulty bending down to tie shoes, our therapists can find strategies and devices to help you regain independence and reduce pain.

We can assess you in your home for safety, and recommend equipment and modifications for continued independence.

Wheelchair assessments and fittings are done at the hospital, TCU, clinic or home.

Physical Therapy

Our therapy team is highly regarded for their passion and philosophy of helping patients return to independence.

Our patients may receive **2-3 hours of personalized OT & physical therapy each day**. We have cutting edge equipment and the knowledge to use it to maximize recovery. Our Physical Therapists are trained to treat...

- Orthopedic Injuries
- Sports & Industrial Injuries
- Joint Pain
- Neurologic Disorders/Stroke
- Movement Disorders/Balance/Parkinson's
- Soft Tissue Injuries

Wound Management

Healing of wounds takes more than time. It takes a dedicated team of professionals and state-of-the-art equipment to assure the best outcome. Our comprehensive wound program includes...

- Weekly physician checks
- Alternating Pressure Mattresses
- Pulse Lavage & Wound Vac
- Access to Tele-Health & Tele-ER for consults with specialists in Spokane or other remote locations
- Whirlpool
- PT, OT & Recreational Therapy

Discover the difference a comfortable, compassionate setting can make in your recovery.
